

DOCKER: MEMORY /CPU LIMITS:

1. To check the usage of individual pods in Kubernetes type the following commands in terminal

\$ docker ps | grep <pod_name>

This will give your list of running containers in Kubernetes To check CPU and memory utilization using

\$ docker stats <container_id>

CONTAINER_ID NAME CPU% MEM USAGE/LIMIT MEM% NET_I/O
BLOCK_I/O PIDS

Query:

```
truncate table Consumed;  
truncate table Produced;  
truncate table Consumer_Attempts;  
truncate table Errors;  
truncate table ScheduledBusinessEvents;  
truncate table ScheduledBusinessEventsExecution;
```

```
select Produced.date, Consumed.date from Produced inner join Consumed on  
hex(Produced.business_event_instance_id)=  
hex(Consumed.business_event_instance_id);
```

Excel:

Diff of date and time :

=(B2-A2)*1440
