CICD - Onboarding json - >

https://prod1.jenkins.lifion.oneadp.com/view/CICD-CI/job/cicd-cd_service_onboarding/

Module.core.iam -

- **IAM** policies can control access to multiple **KMS** keys and provide permissions
- IAM is an AWS service for managing both authentication and authorization in determining who can access which resources in your AWS account. At the core of IAM's authorization system is an IAM policy.
- access resources (kinesis,sqs), security purpose -> on prod 3 Jenkins left panel.(automatically run)

Module.core.secret -

access db -> https://prod3.jenkins.lifion.oneadp.com/view/TF_CI/job/tf_module.core.secrets.db/

KMS: keys used to protect your data. Encryption/decryption
