If getting err while testing above tile: BE not despatched :

Step 1 : hit this get endpoint

{{environment}}/api/data-contract-provider/v0/providers/bulk

Step 2: see whether business-event is there r not , if not present , hit below post endpoint

{{environment}}/api/data-contract-provider/v0/provider

```
{
  "providerIdentifier": "businessEvent",
  "apiVersion": 3,
  "protocol": "HTTPBulk",
  "url": "api/business-events-producer-service/v0/produce/data-contract",
  "preferredPayloadFormat": "name"
}
```

For testing token :

```
const url = `${tokenServiceUrl}/associates/${associateId}/tokens?mask=${mask}`;
```

Set timeout : native promise:

```
await new Promise(resolve => setTimeout(resolve, 100000));
```

```
const key = `${businessEventId}:${clientId}:${associateId}:${dataContractObjectId}:${socketId}`;
// same order , rem clients
```

Doubts:
  1. Promise.all - notifier.js
  2. Visibility timeout - taking long time but remaining not getting executed
  3. Retry mech - status - undefined ??
  4.
